2024

PROFESSIONAL OVERVIEW

Innovative Web Developer with expertise in full-stack development and 3D web applications. Passionate about building immersive experiences with a focus on performance optimization and modern technologies.

WORK EXPERIENCE

Web Developer

Mata Technologies, Cebu City | June-October 2024

- Revamped Ehrlich.ph, handling Figma UI/UX design, WordPress development, and MX record fixes, improving website uptime from X% to 99.9%.
- Pioneered the use of KRpano in the company, replacing 3DVista and delivering virtual tours that were 70% faster than previous solutions.

Freelance Web Developer

Remote | Nov 2024 – Present

- Collaborated with developers in Gummybook, a client management CRM using Next.js, Supabase, Stripe, and TailwindCSS.
- Scraped over 44,000 auto-parts data across different car brands and models for Azimi Autoparts with 98% accuracy.

Junior Frontend Engineer

Workflo – Contractual Full Time, Remote | July 2025 – Present

- Collaborated with the Senior Frontend Engineer on smaller development tasks and UI components.
- Refactored existing code to improve readability, structure, and performance.
- Translated Figma designs into responsive, pixel-perfect interfaces using modern frontend practices.
- Conducted testing of pre-release features, documented findings, and prepared detailed bug reports for the development team.
- Monitored the production environment and reported live bugs or usability issues for timely resolution

PROJECTS

The Flying Pig

Mata Technologies | Borromeo Bros Estate, Inc.

- Led the development of a 360° virtual tour, improving processing speed by 60%, reducing client turnaround time.
- Implemented high-resolution panoramas and SEO optimization, boosting online visibility and engagement.

Costa Vida

Mata Technologies | Megaworld Corporation

- Enhanced virtual tour performance by an additional 30% using newer technology.
- Superimposed 3D structures onto real-world panoramas, improving visualization accuracy by 90%.

VLOG 01

Game Development Capstone Project

- Developed puzzle mechanics, dynamic lighting, and enemy AI, increasing game immersion and difficulty progression.
- Optimized 3D assets, reducing load times by 40%.

Gummybook

Client Management SaaS

- Developed Google/Outlook calendar, Gmail, and Meet integrations via Supabase Edge Functions, streamlining user scheduling and communication.

Azimi Autoparts

Automotive Wholesale Website

- Scraped data with data exchange agreement from various automotive wholesale websites, helping the company sell automotive parts through online shopping.

Workflo Official Website

Productivity Management Tool

- Developed the official website for Workflo.
- Handled all media assets, including animations and images.
- Designed the user interface and experience using Figma.
- Optimized the website's performance by improving load times, responsiveness, and overall user experience.
